

# *Introducing the* **Spasticity Tracker App**

- Do you or someone you care for have a form of muscle tightness called spasticity\*.
  - Is botulinum toxin (e.g., Botox, Dysport, Myobloc, Xeomin) injected for this?
  - Do you have an iPhone running iOS 10\*\*?
  - Additional requirements: 1) Live in the United States, 2) are over the age of 18 years, and 3) can read and understand English
- 

If yes, join the **Spasticity Tracker Research Study**

Go to [spasticitytracker.firebaseio.com](http://spasticitytracker.firebaseio.com) to download the application at no cost and join the study

***The goal of this research study is to better understand how spasticity and botulinum toxin injections impact the daily life of patients.***

---

*\*Spasticity is a form of muscle tightness that can develop in conditions such as brain injury, multiple sclerosis, stroke, and spinal cord injury.*

*\*\*iOS is the operating system software for Apple iPhone and iPads. iOS 10 is available as a free update to all models since iPhone 5.  
The Spasticity Tracker application will not work on smartphones other than the iPhone.*
